HEALTH INTRODUCTION

YOU ARE MOST LIKELY POISONING YOURSELF EVERY DAY!

Would you put a bottle of anti-freeze in your medicine cabinet with your bath soap, shampoos, deodorants, cosmetics, lotions and toothpastes? Would you wash your floors with it? You say, "Of course not!"

Did you know that Propylene Glycol (PG), Polyethylene Glycol (PEG), Butylene Glycol (BG) and Ethylene Glycol (EG) are all petroleum derivatives that act as solvents, surfactants, and wetting agents? These glycols easily penetrate the skin, weakening protein and cellular structure as they do! Did you know factory workers who work with these glycols are warned to avoid skin contact to prevent brain, liver, and kidney abnormalities? PG is present in many stick deodorants, often in heavier concentration than in most industrial applications. (Nyack, Dr. Vin, Ph.D., Biochemist). Propylene Glycol is used to carry the "active" ingredients in transdermal patches INTO YOUR BODY. These glycols are present in MOST toiletries (even health store products) and is often a main ingredient! Shocked? You should be!

Ask yourself What's Anti-Freeze doing IN my soap, shampoos, deodorants, cosmetics, lotions, and toothpaste?

And we haven't even talked about the other known poisons in the products you put onto and into your body such as (to name only a few): sodium lauryl sulfate (SLS), sodium laureth sulfate, formaldehyde, cocamide DEA, titanium dioxide, saccharin, and FD&C Blue#1 – all known carcinogens – meaning cancer causing! Or how about aspartame - a known excitotoxin? Did you know that MSG is found in many of your toiletries and supplements, giving the same side effects but masquerading under the names of hydrolysed protein, calcium caseinate, autolyzed yeast, disodium inosinate, yeast extract, and a host of

other cloaks? Even most mineral and vitamin formulations/supplements are made with carcinogens and rancid oils!

Long before you get the cancer, your body just gets plain sick, the brain can get foggy, children can be labelled with "learning disabilities," and older folks suffer forgetfulness and clumsiness that may be no more than the manifestation of "intolerance to all the chemicals being slathered on and poured onto and into their bodies!"

Our promise to you:

1. ALL the healthy products sold in our catalogue have been carefully and extensively researched and personally used by us before we offer them to you.
2. We have been careful to find products that contain non-carcinogenic ingredients, are often certified organic, and are always free of pesticides, herbicides and harmful chemicals.
3. These products work towards promoting not only a healthy physical body, but also create the foundations for improving your emotional and mental health. When your physical body is strong and healthy, the emotional and mental health can follow.
4. Most of these products will simplify your life and, because they are concentrated, are less costly. Especially when you consider that you will pay less in the future for health care!

"My sister recently gave me a 3 fl.oz. bottle of Crystal Deodorant, roll-on. This is the first effective deodorant I have ever used (and I am over 50!). You can use my statement as a testimonial. I stand by it. I have never used a deodorant that comes close to being as effective as the Pure and Natural Crystal deodorant is."

My family has decided that I cannot be without Maca Root powder - ever! They remind me when I need to re-order because it makes such a difference in my attitude and energy levels. I like "me" much better when I am taking Maca! (Summary of comments from Sue W.)

CREAMS, LOTIONS, OINTMENTS

TROPICAL TRADITIONS SKIN CARE PRODUCTS

Here it is! A line of skin care products free of carcinogens and any ingredients you would not want to put into your body!

Filipinos are well known for their youthful appearance and soft skin, even though they live in a climate that exposes them to the sun's rays year round. Coconut oil is their main dietary oil, and is also the main ingredient in their skin care products.

Only the finest, highest quality, organic products used! All of the skin care products that Tropical Traditions offers are made with organic Virgin Coconut Oil and Virgin Palm Oil. No other products on the market are made with finer oils as their base. Tropical Traditions Virgin Coconut Oil is traditionally made from fresh organic coconuts, and independent laboratory tests show that it has a higher level of antioxidants than other coconut oils. These oils are food grade, not the lower grade, lower quality coconut oils often found in other lines of skin care products.

Virgin Palm Oil contains high concentrations of a powerful form of Vitamin E called "tocotrienols" which published research has shown is 40-60 times more potent than alpha-tocopherol (the most common form of Vitamin E found as an additive in most skin care products.) In addition to these powerful Vitamin E tocotrienols, Virgin Palm Oil is also rich in natural carotenes. It is one of the richest natural plant sources of carotenes with concentrations of 500-700 ppm. It is 15 times more retinol-equivalent than carrots and 300 times more than tomatoes, for example.

In addition to using only the best oils available for the skin, all other ingredients used in Tropical Traditions Skin Care Products are 100% natural. Their hand-made creams, lotions and lip balms **contain no alcohols, no artificial fragrances, and no petroleum** products. Since many people have sensitivities to fragrances, each product has an unscented version. For those products that are scented, only high quality organic essential oils which are distilled with low temperature and low pressure over an extended period of time are used. Low temperature and lower pressure have proven to be the most effective method of obtaining all of the essential constituents from the plant, and provide these products with the very best quality fragrances available.

DEODORANTS

Antiperspirant prevents perspiration, without which the body cannot purge toxins from below the armpits. Those toxins are then trapped and the body deposits them in the lymph nodes below the arms. A high concentration of toxins build up, which can lead to cell mutation – cancer! Nearly ALL breast cancer tumours occur in the upper outside quadrant of the breast area where the lymph nodes are located.

Do you know that aluminum used as an ingredient in many deodorants is suspected of being linked with Alzheimer's and other health problems?

Tropical Traditions Deodorants

Tropical Traditions Natural Deodorants are chemical-free, paraben-free, and aluminum-free deodorant roll-ons made from a base of their popular organic Virgin Coconut Oil. Your underarms are one of the most sensitive and absorbent areas of your body, so don't put harmful chemicals into your body through antiperspirants or harmful deodorants! These are perfect for someone who likes to have a deodorant with a fragrance to it.

★NOW Vitamin D3

Vitamin D is normally obtained from the diet or produced by the skin from the ultraviolet energy of the sun. However, it is not abundant in food. Vitamin D supplementation is often necessary for those who avoid sun exposure or live in northern areas to ensure that their body receives an adequate supply. This is particularly true during the winter. This important vitamin aids the immune system and helps it to fight off viruses and infections and our family doctor says it is necessary to have sufficient enough presence of vitamin D3 in the body to ward against heart attacks.

SWEETENERS

The McLellan family uses both the Stevia and the Organic Cane Sugar and give them each a top 5★ rating! See our website for additional information.

Natural Organic Cane Sugar from evaporated cane juice. The difference isn't just in its natural light tan colour or its pleasant flavour! It is made at the mill from fresh-cut cane within 24 hours of harvest. The cane is green-cut not burned prior to processing. Natural lime is used in the clarifying process, as opposed to animal or vegetable flocculent. It is a "first crystallization" sugar made directly from the original cane juice, not from remelted raw sugar. No herbicides, pesticides or chemicals are used in the field or in the process. It is not bleached or decolourised. Retains trace elements originally found in the cane juice. Is organic. It tastes naturally great!

ORGANIC SEA SALT

Treat your body to the benefits of this real, true salt as it is supposed to be (not the common table salt which is the chemical sodium chloride). Naturally occurring elements and minerals buffer sodium chloride and balance hydrochloric acid. Traditional table salt is dead, and many sea salts are heavily refined, removing important components. Natures Cargo Sea Salt™ has a perfect balance of essential trace minerals and gases. Excellent as an aid to digestion and for those with high blood pressure. Remember, a traditional "salt" restricted diet is actually a restriction of "sodium chloride," not of salt that is in harmony with the natural saltiness of the human body. Nature's Cargo Sea Salt™ is literally a living salt.

Harvested in South America, once you have tasted these salts, you will probably never again want any other salt! The naturally white Crystal Sea Salt has not been bleached and is high in mineral content.

Testimonial from a family experiencing that ♥ The heart of education is the education of the heart! ♥

"I just wanted to let you know how much we are enjoying the materials that we received from you. By the end of the first week of doing CCC Phonics and Math and reading the beginning of Leading Little Ones to God, both our children received Jesus as their Saviour. Because the materials were so thorough we knew they had an excellent understanding of what they were deciding to do. We have also been reading the Thornton Burgess series and in one of the books it was talking about the two voices inside. I was able to explain to the boys about the sin nature and the voice of our conscience. My eldest boy Caleb (51/2yrs) was able to recognise this when we dropped off a little child we had been minding. We went inside and there was an awful show on the television. He withstood it for a few moments and tugged me on the sleeve asking if we could go quickly. We left and as we did he said to me, "Mum my sinful nature was saying 'go ahead watch it - it's ok.' but my conscience said 'No, don't do it - go.'" Wow, I was amazed at such a clear understanding and pure application. He has always been very sensitive in this regard but now he is able to understand what is happening and articulate that. ... Samuel is doing wonderfully well too. He loves the work so much he cries when we are finishing our Math lessons, not starting them – which is so encouraging. My husband is so thrilled he said that it is very different to what he experienced as a boy in school. What treasure – to have a love of learning. So....yes we are overjoyed at the materials we have purchased from you. At any point in the day or evening I can put my hand on something that will fill their minds and spirits with life. What a blessed Mummy I am! Thank you!!
God Bless, Beth Woolrich and family.

Rick & Marilyn Boyer Seminars
1 - 2 CDs - \$6.97*each
3+ CDs - \$6.47*each

★#7573CD - **Breaking the Shackles** Rick Boyer
Why Parents Should Trust Themselves Not Schools: When the training of children shifted from the realm of the family and moved into the realm of government, it took only a few generations to bring about the social, spiritual, moral and intellectual decay that permeates our society today. God the designed the family, not the school, to be the primary training ground for His champions.

★#7575CD - **Building A Work Ethic in Your Children** Marilyn Boyer
In a time when young people are generally expected to be lazy and irresponsible, diligent sons and daughters stand head and shoulders above the crowd. Learn how to instill a heart of servanthood in your child

#7570CD - **Careers Without College**
Rick Boyer – More and more colleges are welcoming home educated students. But just as college is not the only means of acquiring a higher education, neither is it the only way of preparing for a rewarding career. This workshop discusses the routes taken by several prominent Americans who reached the pinnacle of their chosen fields without attending college.

★#7574CD - **Child Discipline: A Positive Approach** Rick Boyer
As one who knows the importance of obedience to a peaceful and productive home, Rick shares, from Scripture and his own experience, the principles that make child training a loving relationship rather than a set of behaviour modification techniques.

★#7576CD - **Educating for Eternity**
Rick, Marilyn, Rick Jr., Tim, Nate, Kate, and Laura Boyer – Hear Rick and Marilyn, with five of their adult children, explain the scriptural method for passing on a vision of powerful Christian living from generation to generation through family discipleship.

#7561CD - **Getting It All Done** Marilyn Boyer
Have you ever felt overwhelmed with the demands of parenting? There are ways to make life easier and more productive, and this workshop discusses some of those. Marilyn shares her techniques for accomplishing a mammoth amount of housework while giving her children a superior education at the same time.

#7562CD - **Hands-On Character Building**
Marilyn Boyer – Learn how you can put Scripture on your "doorposts" (the physical structure of your home), your "phylacteries" (wearing apparel), and remind your children of the truth of God during the four natural learning times: bedtime, waking up, sitting at home and travelling. Dozens of projects will be given to provide you with practical applications.

#7571CD - **Heroes: Standing on the Shoulders of Giants** Rick Boyer
An important part of parenthood is giving our children a legacy of heroes to inspire and challenge them.

★#7577CD - **Holding Their Hearts**
Marilyn Boyer – Marilyn shares from her heart how to effectively reach the heart of your children in order to instill a love of God in each one of them. (Formerly called Parenting From the Heart).

#7563CD - **Home Educating with Babies and Toddlers and Loving It** Marilyn Boyer
It's a blessing but it can be stressing! Home schooling with tiny ones around the house is a special challenge, but one that many moms handle with great success. Hear how Marilyn makes her little ones a valuable part of the team!

#7569CD - **Homeschooled Heroes - How They Did It** Rick Boyer
Many of the most important and best-educated people in history (Washington, Lincoln, Edison, Franklin) spent little or no time in school. Learn from their experiences how to educate your children for greatness.

★#7578CD - **Obedience From the Heart**
Marilyn Boyer – Nothing more blesses the heart of a parent than a child who obeys consistently and willingly. Marilyn shows why the task of the loving parent is not merely to control outward behaviour, but to build godly attitudes by ministering to the spirit of the child!

#7564CD - **Parenting From the Heart**
Marilyn Boyer – Child-rearing is not behaviour modification, applying rewards and punishments to get unthinking responses. It is a matter of accepting a God-given calling and pursuing it by His principles. It is a heart-to-heart relationship in which children are not just trained, but disciplined.

#7565CD - Proverbs - God's Character**Curriculum**

Rick Boyer

If you were the wisest man in the world, what would you teach your children? Learn the answer to that question by understanding the Old Testament book of Proverbs. There, a man specially chosen by God records important lessons of wisdom and knowledge. Here is a practical application for the Book of Wisdom, including several ways to teach it to your children.

#7566CD - Raising Cain without Killing Abel

Rick Boyer – Scripture records several cases of strife between siblings. In almost every case, there is a principle involved which the parents have violated, sowing destruction in their family. This series of case studies gives valuable insight into the causes, and therefore, the cures of sibling rivalry.

★#7579CD - Starting Right, Staying Right

Rick Boyer – The key to successful home schooling is to have a true understanding of what it's all about in God's frame of reference. Curriculum, values education, social learning and priorities are all addressed in the Bible. In this practical, encouraging presentation by Rick Boyer, you will see that God has a dynamic plan for growing up.

★#7580CD - Take Back the Land

Rick Boyer

Today, home schooling parents have broken free from the bondage of Godless philosophies and are raising up the Joshua generation that will carry the battle over the Jordan--taking the banner of Christ back into American government, law, medicine, business, education and the arts, where God and His Word were once universally honoured.

★#7581CD - Teaching Character Through History

Rick Boyer

Perhaps the most important way in which children learn good character is through the example of others. Rick Boyer discusses how to use the lives of giants in American history to motivate your children to aspire to greatness.

#7567CD - The Hands-on Dad

Rick Boyer

Many home educators see the father's job as either that of substitute teacher standing in for Mom occasionally, or school janitor – doing housework to give Mom more time in the classroom. But the father's role is much more than that. Rick Boyer explains the seven functions of a father in Scripture and how they apply in the home teaching family.

#7572CD - Things I Wish I'd Known

Rick Boyer – Growing up has never been easy, and today it is harder than ever before. But guidance from those who have been through it is as useful as the

services of a wilderness guide. In this talk, Rick Boyer shares how God's principles give vision and victory for the young person who wants to be more than ordinary! This seminar is geared to young people.

#7583CD - What is an Education?

Rick Boyer

Many people succeed in school but fail in the real world outside. Real education prepares the student for every aspect of life - practical, professional, spiritual, economic, civic. Jesus came not to be served, but to serve. Those things that make us most useful for service add up to a real education

#7568CD - What About Socialization?

Rick Boyer – Intimidated by the common myth that children who are taught at home are at a disadvantage in social development? Rick Boyer draws on Scripture, scientific research and the experience of thousands of home-teaching families to show that the opposite is true. To prepare children for the real world, they need to be in the real world: family, church, and community – not locked away in age-segregated schools.

★#7582CD - What's a Dad to Do?

Rick Boyer

There are plenty of misconceptions about the role of the father in a homeschooling family. Scripture gives seven functions of a father in a godly home, and each of these can be applied very practically and powerfully in home education.

LOVE LANGUAGES

Five Love Languages Series

Author: Gary Chapman

People communicate and receive love in a number of different ways. Each of us approaches life through one main love language and may be totally unable to understand the others. Sometimes children and even adults do not feel like they are loved simply because they do not recognize it when it is shown in a love language other than their own. You can avoid misunderstandings in the family by understanding what each other is really saying. You may speak a different love language than your children, spouse, brothers, sisters, or other family members and that can cause friction. Let these books show you how to put yourself into their shoes and view life through their eyes. (paperback, 200+ pages each)

Overprotective mothers and fathers teach their kids to live passively; kids. If you want wholesome, living books that go beyond just entertainment value for your children and future generations to come, it is up to you to purchase them now! In purchasing books for your home library, choose volumes with excellent and celebrated writing and literary styles, solid moral and/or spiritual lessons, and values you and your children can be challenged to embrace. THE ADVENTURE SERIES

Children are fascinated with the natural world around them and with facts and information about animals and countries that they have never seen. However, often good nature programmes on T.V. or articles in magazines centre on evolution and completely ignore the Creator. Your children will learn all kinds of interesting facts about places around the world while being pointed to the Creator and Designer of it all. Each book contains several stories, each with a Bible verse (various translations) and lesson for the reader to take away. Each book also contains discussion questions and a quiz at the end of the book to see how much they can remember. (Paperback, 96 pages each.)

ANIMAL BOOKS

ANIMAL BOOKS

Whatever could you learn from animals? Lots!!
God uses animals and birds frequently in the Scriptures to illustrate positive and negative character qualities. People would do well to be as faithful as a dog, as happy as a lark, gentle as a lamb, as industrious as a beaver, and so on. Children and adults alike can learn valuable lessons from the creatures God has created. We have two dogs and six cats we learn from! Don't miss out on the valuable lessons God has put before you through the pens of skilled authors.

NOTE regarding "talking animals":

We believe that while animals do not speak a human language, we can still learn from them. It is not a far stretch for the imagination of a child to hear them "talk." Just listen to children talking to their pets!

Critical Thinking books can help you build your children's thinking skills for better academic performance.

CRITICAL THINKING PRESS (CTP) BOOKS ENCOURAGE:

• **Superior Academic Performance** - Good thinkers and problem solvers get good grades.

• **Better Test Performance** - From elementary school to graduate school more and more tests focus on how well your children think and less on how much they have memorized. These products will help your children excel at all these tests.

• **Lifelong Learning** - Give your children better thinking and problem solving skills for life! Children who enjoy problem solving and thinking have an excellent chance of becoming successful lifelong learners.

• **THEY WORK!** We used some of these terrific books from July 2001 to June 2005 with two girls who had many significant learning challenges. WOW! What a difference we saw in their thinking, reasoning and verbal skills, not to speak of their academic progress. These would be good for most children.

• **SPECIAL NEEDS CHILD?** Call us at 519-925-9721 for specific recommendations to address specific learning challenges.

FREQUENCY: Designed to be used 2-3 times per week, 15-20 minutes, but our girls wanted to do the activities every day!

NOTE: Grade and age levels are suggestions only. Often older children will benefit from lower level books to build their thinking foundations. The teacher guides

are essential for some books and are certainly handy in all cases for the busy parent, and particularly for the parent who needs to learn some of the concepts themselves. It also helps in solving disputes between the child who "knows it all" and the parent who is convinced they have the correct answer!

"Much of what is said in the arts cannot be said in another way. To withhold artistic means of understanding is as much of a malpractice as to withhold mathematics."

Howard Gardner, Harvard's Graduate School of Education

Current studies link art education with higher performance in academic subjects.

"The 1987, 1988, and 1989 profiles of high school students who take art courses tend to have higher scores on the Scholastic Aptitude Test (SAT) than those who do not." SAT Scores Found to Correlate with Art Study. Soundpost, vol. 18, 1990, p. 21

Can you afford to neglect art and music instruction?

JOY • NOTES MUSIC

QUESTIONS:

1. You have heard that the study of music and art enhances academic learning but are not sure you can fit it into your schedule?
2. You can't read a note of music yourself? Or perhaps you can, but you would not dream of trying to teach your child music?
3. You have always wanted to learn a musical instrument but figured you just are not "musical enough?"
4. Your child wants to take music lessons but you are not sure you can afford the time or the money?
5. Not sure you or they will "stick with it?"

THE ANSWER: Let Joy•Notes come to your rescue!

Joyce Piper, Joy•Notes' founder, believes that the world of music is within the reach of anyone who desires it. Music speaks to the spirit. This course delivers the tools to discover and achieve musicianship - regardless of the age of the student.

The musical language skills gained through the Joy•Notes course provide the foundation for all instruments, including the voice. The ability to read and understand the musical language opens up a rewarding and beautiful appreciation for God's gift of music.

By learning the language of music with a piano keyboard, the student has the added benefit of "seeing" the music in "black and white."

Beginning with the first lesson, the student will:

1. learn to hear, see, and feel music simultaneously
2. learn to see patterns in music notation
3. learn that the staff lines are simply a visual picture of music in any form and on any instrument and they will learn how to understand those "pictures"
4. be taught the skill of understanding musical language such that they will be able to go on to play any musical instrument, including the vocal chords
5. learn to play both hands together
6. be taught in such a way that they will not get hung up on "note names" or confusing counting instructions
7. will learn proper hand and finger positions for piano
8. will lay the foundation for quicker learning at higher levels once they graduate from the Joy•Notes course.

Joy•Notes simplifies the teaching and this step-by-step method literally takes the student, and you as the teaching parent if that is the case, by the hand

COST EFFECTIVE! Typically music lessons cost \$18 to \$20 for a half hour in a studio. For less than the cost of eight lessons you can receive up to two years of lessons!

Course Content

The Joy•Notes course covers approximately two years of instruction, depending on the amount of time spent in practice. The student will be ready for grade two conservatory lessons, or to learn with any other types of lessons or private study.

Program includes the following materials:

- three workbooks
- Curriculum Guide - easy enough for even the musically challenged to understand but impressive enough for the skilled musician to appreciate!
- Teaching Guide on 2 CDs - Joyce Piper covers each concept in the course (takes you by the hand!)
- Joy•Notes Patterns - 5 note pattern cards, keyboard staff templates, and 8 note pattern cards.

Joy•Notes Full Package

CURRICULUM RECOMMENDATIONS

CURRICULUM RECOMMENDATIONS

Confused? Not sure just what you need to purchase for curriculum? Let us help you wade through the many options! We have been helping people just like you since 1985 as a family & 1993 as a business!

Our Personal Educational Philosophy:

- to build each individual, whether child or adult, spiritually and in Godly character
- learning and growth are life-long processes.
- to train children in life skills, physically, and mentally in that we teach them to think and be creative, and academically by laying strong foundations in math and English. This goes beyond filling their heads with facts and "school work."
- to provide needed time for play and ministry

Academic resources:

- need to give great results
- not have a lot of repetitive busy work
- need to be easy to use with a minimum of pre-planning (if any!)
- be adaptable to any learning or teaching style.

We specialize in resources for building spiritual and character development.

Our Resources:

1. help you to educate your child spiritually (at the heart level), academically, and sometimes, physically
2. complement each other
3. are easy to use and effective
4. take little or no preparation time and require a minimum of teaching time
5. many are "ungraded" - meaning you can teach several ages of children together - saving you time!
6. are often advanced so your child learns more, more quickly, thus saving you money down the road
7. Don't let the low prices have you thinking these are not complete curriculums. They ARE COMPLETE! We have looked hard and long to find dynamic, effective resources at prices you can afford.

Important Notes:

1. Each item we sell is thoroughly explained and often with sample pages in our catalogue cd and on our web sites at <http://www.joycenter.on.ca>
<http://www.pathwayreaders.com>
2. We often sell "package deals" at a discount
3. All items are available for individual purchase
4. Sample lessons, pages of books, sound-bites are on our website and more are being added regularly.

What Style of Curriculum to use: We recommend purchasing resources (tools) the teaching parent will feel comfortable with. If you try to find resources in every subject specifically for each child's learning style, you will soon be swamped with stuff that you don't get the hang of using before you are on to something else for the next child! Adapt your tool to your individual children and their unique learning styles. The resources we carry lend themselves well to being adapted by teacher and learner! Learn to use your tools and, like using a butter knife for spreading butter, opening a jar, screwing a screw, prying off a paint can lid, punching a hole, cutting bread, propping up a window, and curling a ribbon, be creative!

Getting Started: We recommend starting out with just math, English, and thinking skills instruction until the child is about age ten or eleven. Fill the rest of your day with lessons in practical life skills, spiritual and character development, art and music. With strong foundations in these areas your child will be ready to tackle any other subject later on and will face life with Biblical wisdom and Godly character. Add science and social studies as there is interest, if the child is older, or if your School Board insists.

Using ungraded and graded curriculum: Few children are solidly working at one specific artificial "grade" level so the ungraded materials are excellent and can be used with a range of ages. Consider the "graded" resources we sell as "levels" to go through at your child's speed – whether that be slower or faster than others, much like playing a piano. Start with one or two resources at a time and gradually add new studies to your basics.

NOTE: MATH CHOICES

We feel strongly that Professor B Math is an excellent, economical, ungraded approach, teaching math skills to a solid 7th grade level within 3-5 years, beginning with children as young as 5 or 6 or older. **Christ-Centered Curriculum Math** is excellent for ages 4-6. We realize many people want a graded, traditional approach in the early years, so we offer you **Spunky Math** for grades 1 & 2, and **Study Time Math** for grades 3-8. They are traditional approaches with practical life applications, no "busy work," and a simple, solid, no-fuss approach. Use Christ-Centered Curriculum, Spunky, or Study Time on their own or as supplements to Professor B to cover areas such as geometry, charts, graphs, money, temperatures.

Advanced Math – Life of Fred Math – again, this is NOT a traditional approach but is excellent for making math fun and relevant. Use either Professor B for algebra or Life of Fred, which also has books for Fractions, Decimals & Percents, Biology, Geometry, Trigonometry, Calculus, Statistics & Linear Algebra. Life of Fred prepares the student for third year university math! (Physics & Economics math are coming.)

Christ-Centered Curriculum[™]

Dare to Develop Young Children Spiritually and Morally!

**Even a child
is known
by his actions.**

*How do you want your child
to be known?*

Christ-Centered Curriculum will give you the tools you need to instill godly character and spiritual maturity in your young children while teaching them phonics and math. Watch your family grow in wisdom and stature and in favour with God and men.

- Are you concerned about your child's spiritual growth?
- Are you unsure that you have the skills necessary to prepare your child for life - both spiritually and academically?
- Are you short on time and trying to choose between a solid academic foundation and a solid spiritual foundation?
- Do you have multiple children and struggle to balance teaching with taking care of young ones?
- Are you wanting easy to use, effective lessons for teaching phonics and reading?
- Are you willing to follow easy-to-use lessons to help your child develop spiritually and morally?

Christ-Centered Curriculum provides incredible lessons that enable you to develop children spiritually and morally in only 30 minutes per day while teaching phonics!

These simple, easy-to-use lessons are so saturated with Scripture and its principles that it clearly stands out from other phonics programs. Christ-Centered Curriculum is more than just a phonics program. This program enables you to follow the Scriptural directive to "add to your faith virtue, to virtue knowledge." (2 Peter 1:5) You will be teaching your child's spirit first (Prov. 1:7) and will then be able to rejoice when you see God enlighten his academic knowledge as rapidly as his individual, God-given capabilities allow (Psalm 94:10). His Word is so "living and powerful" that many parents have told that the Scriptures in the lessons have addressed something that just happened in their family. You will find that the lessons are so saturated with truths of Scripture you will learn and grow spiritually along with your child.

- Why should you teach your child to read?
- Why not just let it happen?
- Does it really matter what I use to teach phonics?
- Won't the cheap books from the dollar store do the same thing?

Would you leave your child to learn road safety on their own? Would you trust a stranger you did not know to babysit your child just because they charge less? Do you not take care to teach your child how to be safe and aware of their physical surroundings? Why should you do any less for their academic and spiritual life?

The premise for teaching your young children to read is based on the verse, "And all thy children shall be taught of the Lord; and great shall be the peace of thy children." (Isaiah 54:13) **Capturing young minds captures the future.** God expects us to protect our children's minds (Col. 2:8) and hearts through passing on the faith (Ps. 78:5-7). All curriculum is inherently religious because a world view, or way of looking at things in the world around us, is at the very core. Therefore, beginning in a child's highly formative years, it is crucial that the curriculums used pass on a thoroughly Biblical world view. Christ-Centered Curriculum Phonics and Math does not simply tack on some Bible verses to ordinary secular (without God) materials. As fundamental skills are being taught, the content, saturated with truths of Scripture, trains both a child's mind and heart – as well as the teacher's – to view everything from God's perspective.

Step-by-step lesson plans make teaching Bible, phonics, reading, and math a cinch. There is virtually no lesson planning. Our materials have been simplified so that even the novice can feel confident, and thus achieve great results! An older child could easily teach the younger children! Proven Tips, Tools and Tactics To Develop Children Spiritually, Morally, and Academically

We believe the curriculum has proven itself to be effective for early childhood and beyond. For over two decades, Christian schools and home educators using our full program have been blessed with tremendous results – high spiritual, moral and academic development of Christ's lambs. Christ-Centered Curriculum is a wise investment in the educational and spiritual foundations of your family.

God has used Christ-Centered Curriculum material in many wonderful ways It is not just my children who have benefited from the Christ-Centered Curriculum. The Lord used it to change my life as well. As I taught my children I noticed that my world view was changing! Praise the Lord! In addition to my world view, my work ethic was also changed. I thank [God] for leading me to your curriculum and I pray you will be encouraged to continue doing the work He has prepared you to do." Orange, CA

About Grade Levels

This is an ungraded curriculum. Start where you need to start for each individual person. While it is recommended, you do not need to complete each level in one academic year. Take the time you need!

Teach each child according to their own abilities. Do not hold a younger child back just because he might surpass an older sibling. Teach them that God gives each one differing abilities and time tables for learning. We are not in a race or competition. As we help each other, we work together as a team.

Do not refer to these books by grade, but by level. If your six-year-old begins with Level B, do not say the books are used by kindergarteners. If your ten-year-old would benefit from Level C, do not tell him he is using a book that some six-year-olds are using. The truth is, on completion of Level C, most children have decoding and reading at high grade levels and can be placed into at least grade four of most graded curriculums. That level is recommended due to emotional development. Older children, on completion of Level C, should complete diagnostic tests for proper placement in the curriculum of choice.

Beginning to Read Program

The Christ-Centered "Beginning-to-Read Program" is designed for children who need to learn:

- How to recognize and print the alphabet.
- How to know what sounds vowels/consonants make.
- How to blend consonant and vowel sounds together.
- How to read and spell one- and two-vowel words.
- How to read simple phrases and sentences.

The Beginning to Read Program consists of two levels.

LEVEL A is designed for four-year-olds or those who are developmentally delayed and need a slower start. If taught properly, a child who has completed Level A can commonly read at a 1st grade level in one year.

LEVEL B is designed for those five or older who can not read to a 2nd Grade level and for those who have finished Level A. A child **does not** need to complete Level A before starting Level B. Within one year, if taught properly, a child who has completed Level B is usually reading at a 2nd to 3rd grade level or even higher. Primarily the reading level depends on the amount of reading practice the child does.

Advanced Phonics Program

The Advanced Phonics Program is specifically designed for children who need to learn:

- How to identify the different types of syllables.
- How to divide a word into syllables, and where an accent (the stress) is generally placed.
- How to read paragraphs smoothly, with expression, from one line to the next.
- How to read and understand frequently used prefixes and suffixes – especially pronunciation of prefixes in accented and unaccented syllables.

Reading comprehension is developed through:

- (1) Clear pronunciation of words
- (2) Grouping words together to sound like talking
- (3) Using proper voice inflection [the rise and fall of the voice when speaking], and
- (4) Observance of punctuation marks.

The Advanced Phonics Program, **LEVEL C**, is designed for a child who has completed Level B and is an independent reader. It can also be used with an older child who lacks a strong phonics foundation.

"The longer I use CCC, the more I appreciate it. Listening to some of my friends' problems with other curriculums, I am thankful the Lord led me to CCP. Thank you!"

AGE RECOMMENDATIONS

I'm Convinced! Where do I start?

THREE-YEAR-OLD CHILD: (Orally)

For a three-year-old, purchase the following items:

- Teaching 3s Character, Phonics, and Math (#101)
- Phonics Flashcards 118 card set (#325)
- Math Teaching Aids (#018)
- Alphabet & Number Tracing Masters (#335)

All teaching for a three-year-old is done orally. There is no workbook recommended. You should spend no more than 5 to 10 minutes a day on phonics and the same on math when your child is this age. For some children, you can double the time.

FOUR-YEAR-OLD CHILD: (Level A)

For a four-year-old, purchase the following items:

- Teacher's Phonics Kit (#010)
- Phonics Flashcards 118 card set (#325)
- Student Phonics Kit A (#012)
- Mathematics Kit (#011)
- Mathematics Teaching Aids Kit (#018)

Use Student A kit for fours (or fives requiring a much slower pace). Note: A five-year-old just starting out does not have to do Level A before starting Level B.

You should spend no more than 10 to 15 minutes per day on phonics and the same on math when your child is this age. You can double the time for some children.

AGE FIVE or OLDER (Level B)

For children five or six years of age and for any older student who is a not an independent reader purchase:

- Teacher's Phonics Kit (#010)
- Phonics Flashcards 118 card set (#325)
- Student Phonics Kit B (#013)
- Mathematics Kit (#011)
- Mathematics Teaching Aids Kit (#018)

DO NOT use Program A with a five or six-year-old as this will place undue delay in your child's academic advancement, unless he is not eager to learn yet.

Use Student Kit B with five-year-olds, beginning 1st graders (children who have not been previously schooled), and older students needing a review or to lay solid foundations. You may find Level B will be easily grasped by the older child, thus boosting self-esteem and confidence while preparing them for Level C, making it a worthwhile investment.

For a five or six-year-old, spend up to 20 minutes per day in phonics and the same in math. Spend up to 30 minutes per day per subject with an older student. For some children you can double the time.

CHRIST CENTERED CURRICULUM

AGE SIX or OLDER (Level C)

For those finished Level B, independent readers, and those needing phonics remediation purchase:

- Student Phonics Kit C (#014)
- items: #307, #315, #321, #328S

Level C can also be used for an older child, teen, or adult who is an independent reader but needs some "beefing up" on phonics and grammar. Begins with a review of vowels for the first ten lessons then moves along very quickly in advancing difficulty.

REGARDING OUR "DYNAMIC TRIO:"

"I am thrilled to say that I have two young ladies now who are reading. Holly (almost 8 yrs) is reading straight from an adult Bible, and Dana (6 yrs) is starting to read 5 and 6 letter words. **I have used CCC** and am totally thrilled with it. As this is my second year teaching it, I am becoming accustomed to how to use it. I have also used **Climbing to Good English** and am totally thrilled with that too. It is such a good reinforcement and something they can work at on their own. I am also using the **Pathway Readers**, and Holly has finished her second book. If I had to grade them on their work I would give them marks in the high 90's!

I understand that this is not because I have gifted children, but because of the amazing resources I have, my commitment to teach it thoroughly, and most of all because it puts Christ in the centre."

CHRIST CENTERED CURRICULUM

A FEW QUESTIONS and ANSWERS ON CHRIST-CENTERED CURRICULUM

Q1: My child NEEDS colour. Your books are all black and white. They look boring. Why do you not spice them up a bit and add colour to the workbooks?

A1: The main reason is that colour is distracting when a child is being taught to read. Their eyes are drawn to the pictures and away from the words. Having line drawings also allows the hands-on child the opportunity to colour the pictures after completing the workbook page. All of the charts and flashcards are bright and colourful. Add colourful stickers to the workbooks as rewards or just for a splash of colour if you want it! We have many stickers to chose from.

Q2: What Scripture translation is used?

A2: The King James Version is used throughout the materials. If you prefer to use another translation, it is quite easy to do so.

Q3: Are there pictures of Jesus in the curriculum?

A3: No.

Q4: Can I photocopy the workbooks?

A4: No. These books are not reproducible. To photocopy them would be a violation of copyright laws.

Q5a: Do you ever sell used materials?

Q5b: I am finished with the curriculum. Can you sell my used lesson materials for me?

A5: We do not have the space to sell used materials but we can sometimes put people who have CCC to sell in contact with those who are looking to buy.

LANGUAGE ARTS

Climbing to Good English (CGE)

Comprehensive Grammar and Writing Skills Curriculum for Grades 1-8

- **Christian values** - solid instruction in language arts, research and writing skills without frills and fluff.
- **Economical** – Climbing to Good English packs a lot of value into very inexpensively priced teacher guides and student workbooks.
- **Comprehensive and advanced** - The books should be considered more as “levels.” Many children in older grades would benefit from beginning with Level 3 if they have not had a good foundation in grammar.
- **Designed for all student abilities** – The workbooks fit both slow and fast pupils. Each page has plenty of work for the average student.
- **3 to 5 lessons per week** – Levels 1-3 each have five lessons per week. Levels 4-8 have three lessons per week. Optional extra practice pages are available for use on the other two days, as practice work for those needing it, or as extra work for faster students.
- **Easy-to-use teacher guides** – “A book is only as good as the teacher who teaches it.” Though a teacher’s edition can’t substitute for the teacher, it certainly can help by suggesting ways of presenting lessons, giving ideas for drill and extra work, and saving time by giving the answers. Review work, tests, and suggested grading methods are also given.
- **Dual grade teaching guides for Levels 5/6 and 7/8** – To help parents save time by making it possible to teach two grades levels in one session, two grades are combined into each hardbound teacher guide. Both grades study the same concepts at the same time. However, sixth and eighth grades are generally on a harder level and often have more work than the fifth and seventh grades. How this can be done is easy to understand if you consider how the skill subjects such as arithmetic, reading, and English are taught. It is very much like building a wall. Each course has the same kind of blocks and mortar, but is on a higher level than the one before.
- **Encourages independent learning** – The pupils are expected to help themselves do much of the work independently without much teacher help. The older a pupil becomes, the more he is expected to do this.
- **Complete and thorough** – Starting with a phonics review and introduction to basic parts of speech and writing skills in grade one, CGE takes the student through to advanced language arts skills in grade eight.

• **College/University preparation:** people have reported testing out of first year college/university introductory English courses based on proficiency gained with mastery of Climbing to Good English. Use 8th level as a highschool refresher course.

• **Writing skills** – all writing skills are covered, including letters, research and note taking, report and essay writing, summarizing, and proofreading skills.

REGARDING CLIMBING TO GOOD ENGLISH:

CGE is easy to use and thorough but not as intense as . . . about grammatical constructs. . . It is simply much more practical in scope—lots of letter-writing, paragraphing, correct usage, mechanics—as opposed to lots of grammar terminology and repetitious exercises. Enough instruction and examples are provided that these workbooks require little teaching time from the parent. They are designed for a one-room school, which is very helpful when one has a quiverful to teach.

Deborah, 2002

I found this language series [Climbing to Good English] to be both challenging and interesting. The skills are taught in a natural progression, with easily understood explanations. The series has a thorough method of reinforcement with practice sheets, reviews, and tests. All in all, it’s a series that serves students well.

Valerie Brown, retired 6th grade school English teacher

We are finishing our CGE 8 and loved it. So easy to use with tests and writing assignments built right in. This course is as comprehensive as anything I've seen, including the high school level. . . . With a few supplements to the writing portions, I see no reason why I couldn't have my soon to be ninth grader either do the same book again, or use the seventh grade edition for new material. . . . She loved this English! I have a folder full of English assignments from Henry Ford Community College in Michigan. The writing assignments and sentence work sheets are no more difficult than what my daughter has done with your Climbing to Good English Level 8. S. Owen, 2003

"The Pathway readers are well done and so interesting. This series has been done for children learning English as a second language. The stories in the first three grades are centred around a family's farming life. I appreciated so much the good values they teach.

"I am finishing my 3rd year with Climbing to Good English which is excellent for English grammar. On my part, I have tried many things... finding the content of English books either insignificant or too advanced. This one is very good and is easy to use with one page per day. In the more advanced levels they refer to the Bible. I am really pleased and so satisfied with my English now. Even my older boy, who was more advanced, I started back in Level 2 so he would have a better foundation in English. It teaches how to write from grade one on, starting with simple sentences, and then it moves on to paragraphs, stories, book reports, and much more." Ginette Gaucher, 2004 (ESL)

★ **SEQUENTIAL SPELLING**

For detailed information about this curriculum, visit <http://www.sequential-spelling.com>

So, you think spelling is hard and boring and there is nothing much anyone can do to make it "un-boring"? Think Again!! Sequential Spelling's approach is quick and easy to use. In fact, if you choose the DVD version of the program, you, as the parent or teacher will have very little to do. Let the children learn on their own, quickly and accurately! Teach spelling in under 15 minutes per day. (2nd Grade through Highschool)

What is Sequential Spelling?

Sequential Spelling is an incredibly inexpensive, comprehensive, effective, and versatile spelling program available in two formats. This program comes in print and on self-instructional DVDs.

Who can use Sequential Spelling?

It can be used with anyone who wants to learn to spell - from the gifted to the learning challenged. It even works with people who have dyslexia. You can very easily tailor it to suit your situation. It is very effective for students who are not succeeding with the standard themed list approach or learning spelling rules.

Sequential Spelling works for teaching spelling to children as young as five (seven is recommended) through to adults. It is recommended that students have a basic phonemic awareness and word attack skills before starting. Younger students who have gone through a solid phonics instruction program and are reading well can use Sequential Spelling. While it is recommended that most students start at level 1, there is a rough placement test available that you can have your student do.

How Is Sequential Spelling Different from Traditional Spelling?

- * Each "lesson" is really a test with a new test given every day.
- * Word lists are based on research word difficulty and on word families - not on themed word lists.
- * Students correct their own mistakes after every word; the teacher shows the correct spelling on the board and the student corrects it if necessary.
- * Students do not have to study or memorize rules. They learn as they are tested.
- * By the end of a lesson, students can spell every word in that word family. They can do this because they have learned how to break down the sounds and find the patterns without learning abstract rules and memorizing exceptions.
- * Sequential Spelling is very effective for dyslexics, even when traditional programs will not work.
- * Students build confidence and self-esteem.

What are the features of Sequential Spelling?

- * uses an ungraded, mastery approach.
- * teaches using word families.
- * consists of 180 - 25 word lessons per level
- * word lists build over the course of approximately four days from easy to advanced words.
- * teaches over 4,000 words per level
- * is flexible and easily customized.
- * improves handwriting as the same letter patterns are practiced multiple times.
- * requires no teacher preparation time.

How Does a Sequential Spelling Lesson Work?

Every lesson is actually a test. There is no studying involved. The student is not shown the words before the test and asked to study them. If you have a student who does not like tests, simply call it a lesson. The author believes that tests should be a learning device rather than a method of evaluation.

Sequential Spelling is completely different from almost all other spelling curriculums. It teaches using word families. Using this method allows students learn to see the patterns in the words they are spelling. (in - pin - spin - spins - spinning)

1. Instructor dictates a word then uses it in a sentence.
2. Student writes the word in his notebook.
3. Instructor writes the correct spelling of the word on a white marker or chalk board, or on paper.
4. Student corrects any mistakes right away.
5. Instructor then gives the next word.

**CHRIST-CENTERED CURRICULUM
BEGINNING MATHEMATICS**

Incredible lessons that you can use to develop godly character in your children and teach them math in just 20 minutes a day!

These simple, easy to use lessons are so saturated with Scripture and its principles that it clearly stands out from other math programs. Christ-Centered Curriculum Math is more than just math. This program enables you to follow the Scriptural directive to “add to your faith virtue, to virtue knowledge.” (2 Peter 1:5) You will be teaching your child’s spirit first (Prov. 1:7) and will then be able to rejoice when you see God enlighten his academic knowledge as rapidly as his individual, God-given capabilities allow.

Every math concept is taught from its roots in Scripture using a proven, multi-sensory teaching methodology to ensure every child is successful. It does not matter whether your child is a visual, auditory, or “hands-on” learner - this program will teach with his learning style.

Each new skill builds upon previous instruction. The spiritual thrust, which has a strong emphasis upon building godly character, shows the beautiful relationship between God and His number system. This is a very unique and exciting program – both spiritually and academically!

The Christ-Centered Curriculum Beginning Math Program is perfect for children who are just starting out in their math instruction. Using proven tips, tools, and tactics to learn math and develop godly character, your 4 to 6-year-olds will learn: Before/after; Greater than/less than; Numeration; Missing numbers; Word problems; Place Value (1's, 10's, and 100's places); 2 and 3 digit addition/subtraction; Fractions (1/2, 1/3, 1/4); Time; Money.

NOTE: Level B prepares for entry directly into grade three math. Use Professor B Level I along with Math A/B or directly after.

Math Level A

Teach your child beginning number concepts while he learns about how God created the universe. Your child will learn about the importance of developing godly character as you study the 1-10 animal number families together. These scripture-filled lessons introduce: number concepts 1-20, counting to 100 by 1's, 5's, 10's and 2's plus addition/subtraction combinations through 10. Included is a suggested daily pacing, character training tips, basic skills (before/after, greater than/less than, numeration, missing numbers in sequence), and word problems.

Math Level B

This workbook is especially rich in spiritual truths! As your child studies place value, he will learn that just as God designed a dwelling place for Himself among men (the tabernacle), He designed a dwelling place for numbers. The study of fractions focuses on giving our “whole” selves to Christ – not just “part.” As your child learns about time, he will learn what God has to say about how to he should use his time. The study of money has its roots in the barter system in the days of Abraham, weights and measures, and finally coinage in the Old and New Testaments. Instruction on money focuses on what God has to say about true “treasure.”

Professor B Mathematics

Unleash the awesome power of your children's "fearfully and wonderfully made" mental computers.

So, You Want To...

- rescue your children from fear and failure in mathematics?
- provide explanations which actually make sense?
- eliminate excessive memorization and rote learning?
- show them how to use their minds to learn concepts & skills?
- understand how to activate the same competence for the learning of stories and one's native language, in order that they will learn mathematics just as effectively?
- use an internationally recognized mathematics method?
- stimulate and activate your children's natural capacities for mastery of mathematics?

Why have your child take eight years to complete kindergarten to 7th grade math when they need only THREE or FOUR years?

Professor B Math:

- stimulates and activates children's natural capacities for mastery of mathematics
- ensures a huge reduction of mental tension
- teaches math as a contextual story that makes sense
- enables rapid and thorough understanding
- eliminates remediation and rote learning
- allows sustained mastery of skills
- uses "mental gymnastics" games and fingers as manipulatives
- allows children to progress at their own speed - as quickly or slowly as needed
- easy to use - virtually no teacher preparation time needed

FOUNDATIONS: Professor B Math is founded on Biblical principles. It does not, however, refer to Scripture or Biblical principles directly.

TELLS THE TRUTH simply in all arithmetic computations without confusing, often time consuming and meaningless steps of procedure and terminology.

COST EFFECTIVE AND NOW AVAILABLE IN THREE DIFFERENT FORMATS:

Well documented studies around the world have proven the effectiveness of PBM. It condenses the arithmetical content, traditionally spread over seven to eight years of expensive textbook and workbook materials into three texts or CDs, three workbooks, and a charts book.

CONSIDER THESE POINTS:

- Each child is "fearfully and wonderfully made" with mental computers of awesome power.
- Just as one's brain was designed by our Lord to assimilate and retain the content of a story, it will similarly retain the content of arithmetic if it is presented as a contextual, developmental flow (a continuing story).
- Arithmetic can be presented as a sequence of developmental steps on a ladder where mastery at previous rungs provides readiness for the next connection.
- Arithmetic can be effectively taught as an upward, progressive climbing of the ladder without gaps rather than as spiral review.
- Facilitating children's mastery of arithmetic is incredibly simpler when approached from the perspective of the Lord's wisdom, order, and design.
- "Master 'seventh grade math' by third to fourth grade. Because our methods activate the same gifts children have used for learning and retaining stories, learning math at this accelerated pace (by means of connections and truth-telling) is incredibly easier than the snail's pace of 'slow motion math' (with its disconnections and untruths)."

WHERE TO START: Students just beginning math will start with Level 1. Older students weak in addition/subtraction skills might benefit from a quick review of Level 1 so that they can "unlearn" improper or faulty ways of approaching math.

MATHEMATICS

PLACEMENT TEST: Request a placement test to determine if an older child could skip Level 1 and go directly to Level 2. This test is available online at <http://www.joycenter.on.ca/prof1.htm>

ATTENTION: Christ-Centered Curriculum users - follow Math Level B with Professor B's Level 1.

GEOMETRY: Professor B Math does not cover geometry. For an excellent highschool level geometry program we recommend **Life of Fred Geometry**.

VISUAL AND HANDS ON LEARNERS:

Professor B teaches to all learning styles but does not use manipulatives. If you have a child who is a strong hands-on or visual learner, it is very easy to adapt the program to use manipulatives. We particularly recommend the Cube-A-Links Cubes, Beginner Counting Set & Place Value Counting Sticks. See our **Math Manipulatives** section.

Rounding out the Mathematical experience:

To introduce additional concepts not covered in Professor B Mathematics, see the graded recommendations lists in this catalogue. The recommended resources will help you to cover telling time, money, geometry, pre-algebra concepts, graphing, drawing pictures to illustrate problem solving, and more.

BOARD OF EDUCATION STANDARDS:

Professor B Mathematics is an ungraded program and because of the way it is structured, you will not follow a traditional track in teaching math. For instance, typical standards have a child into about grade four or five before they use figures in the trillions. Prof. B Level 1 has a kindergarten child reading numbers in the trillions and a second grader can be adding/subtracting numbers in the trillions. We expect a child to actually learn how to perform computations and not rely on calculators as most curriculums teach reliance on! Upon completion of Prof. B Level 3, a child will have more than met the requirements of any provincial or state standards for a seventh grade level in the understanding of addition, subtraction, multiplication, division, fractions, decimals, percentages, prime factorization, and least and highest common factors. Even if you take 1½ to 2 years per level (10 months is the recommended time frame), starting in kindergarten or grade one, the child will be well underway to completing highschool algebra with Professor B Algebra before finishing grade seven!

EXCITING ANNOUNCEMENT: FORMAT #3 - INTERNET BASED INSTRUCTION is so new we had no details when the catalogue went to print. It will be online for a nominal monthly fee per level per family as of May, 2009. Call for details.

"Since using Prof. B Math, I have gained more confidence and enjoyment in working with both my own children (from K to highschool algebra), as well as with other students needing remediation. Prof. B has a unique and efficient method for teaching both facts and concepts which includes the use of his clever Power Learning Charts. I have also found it inspiring to see Prof. B, the master teacher, in action on his videos. Highly recommended!"

Professor B Testimonial:

I would strongly recommend Prof. B Math to anyone. This curriculum is very well planned and organized. In fact, I wish I had been taught math this way!...I like the clutter-free black and white workbooks very much...no distractions. The text, explains how to present the different topics so that anyone who is not a math expert can teach the course. Although this program is teacher-lead, you can just open the book and teach, although I usually take 5 minutes or so to peruse it beforehand. Also, we have found the emphasis on oral work very beneficial as my children have difficulty with orienting numbers and letters. My husband and I are so glad, we feel like we have saved a bundle of money as well as a lot of time and frustration.

Linda Danner, mathematician

NOTE: Now you can teach using CD's!

STUDY TIME MATH

Study Time Arithmetic is designed:

- **to allow children to learn and appreciate numbers and math concepts** as they were ordered by the Creator and how they relate and apply to everyday life.

Rather than story problems about a day at the circus or the batting average of professional baseball players, the material is based on unit themes such as "On the Farm," "About the House," and "In the Shop" at each grade level.

Additional themes include nature topics, world continents, inventions and inventors, & Biblical topics.

- **to be teacher/parent friendly.** Lesson introduction takes minimum time.

- **to be student friendly.** New concepts are introduced gradually and reviewed constantly. Special features are included to intrigue, challenge, and motivate students to learn and discover on their own as much as possible. Focuses on practical applications and teaches metric and standard measurements.

Study Time Arithmetic is a traditional, graded, textbook style, spiral review program. It is similar to Climbing to Good English in design, look, and approach. Follows Spunky Math.

Single use workbooks are paperback, black and white format. Teacher Manuals (except Gr. 3) are hardcover. For Grades 6 to 8 the Student Books are hardcover.

MATH DETECTIVE

 (Critical Thinking Press)

Math Detective uses topics and skills drawn from national math standards to prepare your students for advanced math courses & tests that measure reasoning, reading comprehension, and writing in math.

Students read a short story that includes a chart, table, or graph. Next they answer critical thinking questions to improve their understanding of the math concept and develop their critical thinking (comprehension) skills. Students can not just scan the story for answers - they must carefully analyse and synthesize the information from the text and the chart, table, or graph to explain and support their answers.

Stories are age-relevant, high-interest, and show students that math is integral to everyday activities. Includes general and student introductions, a lesson that explains the concept of evidence, a chart of Topics and Key Ideas to help select activities, and detailed answers.

LIFE OF FRED MATH

So, you think math is boring and there is nothing much anyone can do to make it "un-boring"? You think the average person can't really ever understand math, and "Who needs it?" if you have a calculator in hand! Think Again!!

Never again hear the question which many math students have: "When are we ever gonna use this stuff?" Or, "Math is boring!"

No other textbooks are like these. Each text is written in the style of a novel with a humorous story line. Each section tells part of the life of Fred Gauss and how, in the course of his life, he encounters the need for the math and then learns the methods. Tons of solved examples. Each hardcover textbook contains ALL of the material – more than most instructors cover in traditional classroom settings. Includes tons of proofs.

Written by Dr. Stanley Schmidt with the intent to make math come alive with lots of humour, clear explanations, and silly illustrations that stick in the mind. The student will learn to think mathematically.

Begin after a student understands multiplication and division. Completion of this series prepares student for third year college math.

IMPORTANT NOTE:

Designed to make your child **THINK!** and to learn on their own. It does not give step-by-step directions and answers to every question. They learn to apply to current questions the concepts previously taught. Upon completion they will understand how math works, why it works, and how to apply it. They will know the formulas and how to apply them in real-life situations, not just situations created for a textbook. This program relies heavily on reading comprehension and thinking, not rote spoon-fed learning that is quickly forgotten. Parents can learn these novel methods along with the student, but should not try to integrate the traditional rote/memorization methods.

PROFESSOR B POWER ALGEBRA

Pre-algebra, Algebra I and Algebra II

Professor B methodology carefully nurtures children's perception of connection and flow in arithmetic so they experience enjoyment and mastery of math content. To nurture learners' perception of connection and flow, Professor B Algebra integrates Pre-algebra, Algebra I and Algebra II into a single, ungraded curriculum. Each concept is covered thoroughly, with clarity.

The objective of the three Professor B Algebra books is to make it possible for the vast majority of teachers and parents to competently (and rather comfortably) insure their learners' total mastery of elementary and intermediate algebra. You mothers and fathers who never dared to consider it possible to comfortably teach your children algebra, will now be most pleasantly surprised with your ability to mathematically empower them! These textbooks have been carefully written so that the vast majority of adults, regardless of their math backgrounds, can read them and derive all the algebraic meanings we intend. We make the connections crystal clear. Each textbook contains the answers.

Three books cover highschool algebra and can usually be completed in 2 - 3 years, even by children as young as 9 who have completed Prof. B Level 3.

The textbooks can be used as a textbook and student writes answers in a notebook, or can be used as a consumable workbook. (Paperback, 400+ pages each)

MYSTERY OF HISTORY (MOH)

THE MYSTERY OF HISTORY (MOH)

Learn History the Way It Was Meant to Be Taught!

Study Bible history with other world events happening at the same time all around the world. Unlike traditional history curriculums, MOH does not separate "Bible History" from "World History" because both streams of history impacted the other, and both streams impacted the future and the world as we know it today, no matter where on earth it was happening. With a classical approach, Linda Hobar weaves the story line together of both world and Bible history in Volume I. Subsequent volumes continue to weave the message of the Gospel through the ages.

MOH will unfold connections in history for you and your children like nothing else. You won't find these significant and amazing stories packaged together just anywhere. Linda Hobar did the research for you so that you and your students are free to absorb this history and explore the untold mysteries in between.

- **Save time** - teach K-highschool together!
- The lessons are suitable for the youngest to the oldest child. They contain enough meat for your older student, along with suggested supplemental reading and projects, and simple projects for younger children.
- Three lessons a week will complete a volume in one

year and make history come alive!

- Go quickly for an overview, slowly for in-depth study
- There are no academic limitations to this syllabus.
- Designed to stand alone, each volume is as simple or as in depth as the individual or family wants it to be.
- **Volumes 1 & 2 available now.** 5 volumes planned
- many supplemental resources available
- Recommendation: Rotate the volumes as your children advance. ie: 1st grader repeats Volume I at an older age once having completed volumes 2,3,4 and 5. Next time around they will grasp it at a higher level.

Requires a good quality Bible Atlas and a Historical Atlas. Hobar recommends The Student Bible Atlas (#S653) and the Rand McNally History Atlas of the World (#S654) listed under "Atlases".

Listen to what our product reviewer, Brenda Menzies, had to say about the Mystery of History: Excellent! Nice lay-out and easy to follow. I really like the way it links Bible characters and events with other parts of world history happening concurrently. Accurate and the summaries of many famous people and legends were particularly interesting and well done.

MYSTERY OF HISTORY VOL. #2

Mystery of History Volume 2

The Early Church and the Middle Ages

The Mystery of History Volume II (AD 30 - 1456) picks up where the story of Volume I leaves off - at the death and resurrection of Jesus Christ. It is not an easy history to digest. It was amid trials, persecution, and martyrdom that the magnificent story of Jesus Christ spread.

Study the fall of Rome, the Dark Ages, the chivalry of knights and damsels, kings and queens, and the peasants who faithfully served them, Vikings and villains; castles and crusades; and the poetry of Dante and Chaucer.

Examine the life of Mohammed and the spread of Islam along with the rise and fall of dynasties in Japan and China. Look at the Coptic (Egyptian) Church and Great Zimbabwe in Africa. Unveil the rituals of the Aztecs and the gold of the Incas in Peru, and visit the early peoples of New Zealand and Greenland.

Learn how God spoke through missionaries like Columba, St. Patrick, and Cyril. See the struggles within the church through the ages. Vol. 2 ends with the tragic death of Joan of Arc, the fall of Constantinople, and the invention of the printing press which spreads the Word of God across Europe.

Book includes pre-tests, quizzes, exercises, worksheets, test, maps, projects and more.

The CD-ROM of Reproducibles saves time, money, and headaches. You can print out all reproducibles from the book right from your home computer. The CD includes all pre-tests, quizzes, exercises, worksheets, tests, maps, and appendix pages.

Mystery of History Volume 3 – The Renaissance, the Reformation, and Growth of Nations

THIS IS A SPECIAL ORDER ITEM ONLY. We will not be stocking Volume 3 at this time but would be happy to have it drop-shipped to you. Shipping on these items will be charged separately from other items ordered from this catalogue.

Volume III covers people and events from 1455 to 1707. The Medici's, the Inquisition, and Christopher Columbus. Michelangelo, Martin Luther, and Henry VIII. Copernicus, Shakespeare, and Pocahontas. These are but glimpses of great power, great minds, and great passion.

Volume III look at what was going on all over the world in the order that it happened. So, while the Renaissance and Reformation were taking shape in Europe, we'll look at the rise of wealthy empires in West Africa; the Mogul dynasty of India; and the peaceful lives of the Aborigines of Australia. We will also visit Ivan the Terrible in Russia and the Tokugawa family in Japan.

Stories will be told of the master painters and sculptors who made the Renaissance famous as well as the scientists and philosophers who dissected it. The time period wouldn't be complete without boarding a ship or two to circumnavigate the globe for spices and riches in the East. Many explorers will touch the soil of North America and start a new chapter in world history.

Though recommended that Vol. I and II be studied prior to this volume, it is not necessary. Volume III can stand alone as a course on Renaissance/Reformation.

Each book also contains discussion questions and a quiz at the end of the book to see how much they can remember. (Paperback, 96 pages ea.)

PERSONAL NOTE OF ENCOURAGEMENT:

All of the options for taking care of your physical health and spiritual health, for resources for your family, and curriculum for the home educated can be overwhelming. It seems every product or resource screams, "Take Me!"

With having less than stellar health for most of my life, the advice, recommendations, encouragement to read this or that book, and take products "xyz" for everything that ails one have flooded in.

Having been actively involved in educating children at home for 20 years, I know that lists of recommendations, reading through stacks of catalogues, listening to how other people home school and hearing about what they use, deciding what we should use, and listening to all of those voices flooding into our ears (both supportive and accusatory), thinking about all the "what ifs", perhaps lacking self-confidence, and . . . can be

overwhelming and discouraging! It can all make you want to quit before you start.

A reading I received years ago, when my role as a pastor's wife was getting overwhelming, has been a great encouragement to me. So, rather than fill this space with testimonials from customers about the great products we carry, I share this with you:

I believe, with Christ living in me through the Holy Spirit, recognized, trusted and obeyed, my life today can be happy, restful and strong. DELIBERATELY I surrender my life to Him and trust Him to do the mighty work within of cleansing and empowering.

I believe also that God will manage my affairs today if I hand over the control to Him. I do that now and refuse to take anything back into my care.

In this faith, I go out into the day with quietness and confidence as my strength.

PRINTING AND BOOK BINDING

COPYING SERVICE NOTE: When you purchase any reproducible book at full retail price directly from JOY Center of Learning, we can make additional copies of that same workbook for your family use. The pricing depends on the size, calculated as follows:

WORKBOOKS: (pages) _____ X 9¢ per double-sided page + \$3.00 for the plastic comb binding and cover. Call for pricing.

RE-BINDING OF PAPERBACK BOOKS: We can cut the spine off of MOST paperback books and bind them with plastic comb bindings for \$3.00 each. This is particularly helpful for teaching guides and often for workbooks so they don't snap shut.

Under Control

“Everything’s under control,”
Praise God, there’s peace in my soul;
Though problems abound,
I have heard the blessed sound -
“Everything’s under control.”

Sometimes we wrestle so long
With problems when things all go wrong.
Our minds may not see
What the answer might be
But everything’s under control.

The controlling is not done by me;
Though things aren’t as I’d like them to be.
But when I’ve done my best,
God takes care of the rest,
And everything’s under control.

Praise God, when I’m in His control
And to Him have committed the whole,
His living wisdom and might
Will make things turn out right -
For everything’s under control.

WE ARE THANKFUL FOR THANKS!

“Maxine, you are a wonderful lady to help me with all this! God has got to be happy with you for following your calling. I have five small children - we are not Menonite or Amish - but choose to live the old way in keeping our lives as simple and loving as we possibly can. You have been such a help in the educating of my children. Thank you, In Christ’s love,” Jennifer

“Please keep carrying Pathways readers and workbooks. They are the best, by far, English program I have found. I have used it from K on up through high school.” Linda H.
